EDUCATION

Graphic Era Hill University *Expected Graduation: 2028*

B.Tech in Computer Science & Engineering — Dehradun, India

- CGPA: 7.5 / 10.0 (till 4th Semester)
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Cryptography, Cybersecurity Fundamentals

DSB International Public School *Rishikesh, Uttarakhand*

- **Senior Secondary (Class XII), CBSE** | Year of Passing: 2024 | Percentage: 78.33%
- **Higher Secondary (Class X), CBSE** | Year of Passing: 2022 | Percentage: 86.67%

TECHNICAL SKILLS

Languages: C++, Java, C, Python, SQL, HTML, CSS

Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS

Tools & Labs: Java Swing, MySQL, SQLite, VS Code, Git, GitHub

PROJECTS

Banking Automation System (Java, SQL, AI) **[GitHub]** *4th Semester*

- Engineered a production-ready desktop interface using Java Swing for real-time banking interaction controls.
- Connected a local SQL database backend to strictly process financial schemas, account states, and active login verification.
- Integrated external LLM API endpoints (Google Gemini / OpenAI) to supply responsive automated financial chatbot routing.

Fitness Tracker (C++, DAA) **[GitHub]** *4th Semester*

- Applied core Design and Analysis of Algorithms (DAA) principles to optimize and process local user fitness datasets.
- Implemented custom sorting and search paradigms to track complex metrics including daily caloric targets, streaks, and fitness logs.

Hostel Management System (C, File Handling) **[GitHub]** *4th Semester*

- Developed a command-line architecture in C providing systemic modules for student registration, updates, and exits.
- Utilized flat file persistent architectures with binary stream processing (fread/fwrite) to lock structural integrity.

Voice-Controlled Automation Bot (Python, Automation) **[GitHub]** *Personal Project*

- Constructed an accessibility utility on macOS integrating Speech Recognition pipelines for native vocal processing.
- Wrote web scrapers to dynamically interface with streaming portals like YouTube, automating queries hands-free.

Library Management System (C++, Data Structures) **[GitHub]** *3rd Semester*

- Designed administrative tools handling transaction schemas for inventory distribution, user matching, and late auditing.
- Implemented basic memory structures including linked list allocations and dynamic arrays to prevent linear record bloat.

ATM Simulation System (C++, OOP) **[GitHub]** *2nd Year*

- Constructed a terminal transaction interface explicitly displaying structural Encapsulation, Polymorphism, and Inheritance parameters.

ACHIEVEMENTS & EXTRACURRICULARS

- **Coding Platforms:** Regularly practicing and sharpening algorithmic logic via problem solving on LeetCode with C++ and Java.
- **Competitions:** Achieved 1st Position twice at 'Grafest' Annual Cultural Festival under the Folk Band Competition category.
- **Leadership:** Appointed Lead Keyboardist and Band Leader of 'Brahmas', directing multi-member rehearsals and live sets.
- **Hackathons:** Active participant in the competitive intra-college Hackathon during freshman year.
